

## Public Input No. 69-NFPA 70B-2017 [ Section No. 9.1 [Excluding any Sub-Sections] ]

Electrical studies are an integral part of system design, operations, and maintenance. These engineering studies generally cover the following areas:

- (1) Short-circuit studies
- (2) Coordination studies
- (3) Load-flow studies
- (4) Reliability studies
- (5) Risk Assessment- study
- (6) System grounding studies

### Statement of Problem and Substantiation for Public Input

A system grounding study should be undertaken to determine if the (usually solidly grounded) system is suitable for impedance grounding. There are methods for migrating solidly grounded power systems to impedance (resistance and/or reactive) systems. While there are exceptions, impedance grounded systems generally reduce incident energy for most power systems -- the top most goal for electrical professionals and facility managers in the education, healthcare and other industries. A committee under the IEEE Industrial Applications Society - the Education & Healthcare Facilities Committee -- has been advocating for recognition of this concept across the NFPA 70-suite. Background information is available at the link below:

### Submitter Information Verification

**Submitter Full Name:** Michael Anthony

**Organization:** StandardsMichigan.COM

**Affiliation:** IEEE Education & Healthcare Facilities Committee

**Street Address:**

**City:**

**State:**

**Zip:**

**Submittal Date:** Thu Jan 05 16:07:37 EST 2017

—Copyright Assignment—

I, Michael Anthony, hereby irrevocably grant and assign to the National Fire Protection Association (NFPA) all and full rights in copyright in this Public Input (including both the Proposed Change and the Statement of Problem and Substantiation). I understand and intend that I acquire no rights, including rights as a joint author, in any publication of the NFPA in which this Public Input in this or another similar or derivative form is used. I hereby warrant that I am the author of this Public Input and that I have full power and authority to enter into this copyright assignment.

By checking this box I affirm that I am Michael Anthony, and I agree to be legally bound by the above Copyright Assignment and the terms and conditions contained therein. I understand and intend that, by checking this box, I am creating an electronic signature that will, upon my submission of this form, have the same legal force and effect as a handwritten signature
